

Achieve Next-Level Connectivity with a Software-Defined Network

M+A-in-a Box

Speed and quality are critical when integrating or spinning out applications and infrastructure. Do you have a plan to address crucial components, minimize confusion, and meet aggressive timelines?

At Compugen Systems Inc., we help organizations address top IT challenges that could derail a merger and acquisition (M+A) effort: infrastructure, applications, and data. We help you remove redundancies while uncovering critical gaps and opportunities.

CFOs identify business system and technology integration as the top M+A pain point where most mistakes are made.

FORWARD-THINKING MIGRATION + INTEGRATION

Our advisory services support your long-term success by eliminating complexity and inefficiencies.

Our service delivers a complete IT assessment, vendor agnostic review, migration planning, and integration roadmap for maximizing business value in the future state.

1. IT Assessment

- Take inventory of IT environments across companies.
- Run advanced discovery tools and present reports.
- Identify critical needs, gaps, and opportunities.
- Establish an accurate baseline for recommendations.

2. Transition + Migration Plan

- Map infrastructures, applications, and users to the target environment.
- Create a transition plan and high-level technical design.
- Provide change management and communication planning.

3. Integration Roadmap

- Plan the integration/migration of applications and infrastructure.
- Determine migration path for each infrastructure and application component.
- Design a high-level run-and-operate plan.

MOVE FROM COMPLEXITY TO CLARITY

OUR ADVISORY SERVICES: M+A-IN-A-BOX

We help you gain a comprehensive view of your infrastructure, plan your IT environment, maximize your investments, and lower total cost of ownership (TCO).

Cloud Migration and SaaS Adoption

Identify opportunities to move applications to the cloud for increased scalability, flexibility, and cost-effectiveness to support a robust, modern hybrid IT infrastructure.

Security + Compliance

Recommend technology and processes for governance and risk management, backup and disaster recovery, identity and access management, threat monitoring, and more.

Innovation + Modernization

Evaluate the impact of legacy systems on the overall IT landscape and devise strategies to modernize the infrastructure to drive innovation.

Global Expansion + Vertical Integration

Support your growth strategy and set the stage for future expansion by designing an infrastructure that scales and adapts as your organization grows.

AI + Automation

Streamline business processes, implement AI-driven technologies, and automate labor-intensive tasks to improve cost efficiency and productivity.

Digital Transformation

Align applications and infrastructure with your digital transformation strategy and leverage emerging technologies (e.g., IoT, big data, analytics) to fuel innovation.

Accurate Data Insights

Connect data across your infrastructure, augment data quality, and improve access to advanced analytics to stay relevant in today's data-driven environment.

Application Consolidation

Rationalize and consolidate applications to reduce complexity and build a streamlined, modern tech stack to deliver superior business value and user experience.

REDEFINE YOUR IT EXPERIENCE

Our strategic approach to M+A technology helps you streamline your future IT environments, optimize costs, enhance agility, and drive digital transformation in today's complex environment.

Take the guesswork out of your M+A technology roadmap with Compugen Systems Inc.
