

Store-in-a-Box

Standardized Retail + Restaurant Technology Deployment from Planning through Ongoing Operations

Every successful retail rollout starts with the same challenge.

Compugen Systems' Store-in-a-Box provides a standardized, repeatable approach to deploying and supporting retail technology at scale. By bringing planning, procurement, configuration, deployment, and ongoing operations together under one accountable partner, retailers can improve consistency, simplify execution, and scale with confidence.

What's Included?

Every Store-in-a-Box engagement is built around a deployment-ready technology package tailored to each location. Solutions can include:

- POS Systems, Kiosks, and Digital Signage
- Network Infrastructure
- End-user Devices
- Peripherals
- Pre-installed Applications
- Physical Security (Cameras)
- Employee Mobile Devices + Handhelds

Every component is centrally procured, configured, integrated, tested, and validated in Compugen's North American Technology Centers before arriving ready for installation. The result is less onsite effort, more consistent deployments, and faster store readiness.

Why Store-in-a-Box?

- Standardize technology across every location
- Reduce deployment complexity
- Accelerate store openings and refreshes
- Improve rollout consistency
- Simplify vendor coordination
- Work with one accountable IT Partner from planning through ongoing operations

Retail Programs Delivered Across North America

600+

with more than 28,000 staged
technology components

Supporting the Modern Retail Environment

- In-store experience + POS transformation
- Networking, connectivity + security
- Data + AI
- Loss prevention + physical security
- Technology lifecycle + support services

Proven at Scale

Store-in-a-Box is backed by the experience, people, and national delivery capabilities to support retail environments across North America.

Coast to Coast + North American Wide, we know what it takes to deliver quick resolution of IT issues with the professionalism and service experience that your stores deserve. When you partner with Compugen Systems, our experts slide in alongside your team like one of your own.

One Partner, Full Accountability

Eliminate 12-vendor finger-pointing. Compugen Systems owns the outcome across every location, every region, every system.

Retail-Trained Field Technicians

Techs who know what a POS cutover looks like on a Friday afternoon — not just a data center environment.

Backed by Compugen Inc.

40+ years of North American enterprise delivery, the reach of a major IT partner with the feel of a dedicated team.

Upsource, Don't Outsource

We amplify your internal team. Your IT staff will finally have bandwidth for strategy instead of ticket triage.

One delivery model. Every stage covered.

1

Plan

Technology strategy and planning

2

Design

Store architecture, networking, and security

3

Procure

Vendor coordination, sourcing, and logistics

4

Configure

Imaging, integration, staging, and quality assurance

5

Deploy

Installation, validation, and rollout services

6

Manage

Service desk, field services, lifecycle management, and operational support

Ready for your next rollout?

Whether you're opening new stores, modernizing existing locations, or planning a multi-location refresh, Store-in-a-Box provides a standardized approach that helps simplify deployment and support long-term operations. **Talk to Compugen about your next retail technology rollout.**
